EDUCATION

MSc in Data Science

University of Potsdam

Potsdam, Germany

10/2023 - Present

BSc in Computer Science & Software Engineering

**American International University -
Bangladesh**

Dhaka, Bangladesh

01/2017 - 10/2020

SKILLS

- Data Science: NLTK, Scikit-learn, PyTorch, HuggingFace Transformers
- Programming languages: Python, JavaScript, PHP, R
- Databases: MySQL
- Web development frameworks: Flask, Laravel, Vue JS
- Version control: Git
- Project management: JIRA, Docker

LANGUAGES

- **English**
CEFR Level C1
- **German**
A2 (Studying)

AWARDS

Deans List of Honors

**American International University -
Bangladesh**

WORK EXPERIENCE

Research Assistant (QUADRIGA)

Jan 2025 - Present

University of Potsdam | Potsdam, Germany

Supporting technical implementation and contributing to the creation of open educational resources focused on enhancing data literacy.

Student Assistant

Mar 2024 - Dec 2014

BAM | Berlin, Germany

Worked on ontology-based material database for the LeBeDigital project, and developed a web application to facilitate concrete research and production.

Web Developer

Jun 2023 - Oct 2023

Solar-ICT | Crissier, Switzerland

Led full-stack web development projects, supervised a team, prioritized tasks, and ensured timely project delivery.

Software Engineer

Jul 2020 - Apr 2022

Fronture Technologies Limited | Dhaka, Bangladesh

Built and maintained web applications, working on both backend and frontend. Integrated REST APIs and improved performance through code refactoring.

PROJECTS

Character-level Language Modelling

Developed an LSTM model, and trained it with Charles Dickens novels to generate text, one character at a time.

Tech Stack: Python, Pytorch etc.

Intent Classification with FNN

Implemented a Feed-Forward-Neural-Network from scratch, and trained it with backpropagation to classify intent from the Sonos NLU Benchmark dataset.

Tech Stack: Python, Numpy etc.

Clickbait Spoiling

Built a classifier using Webis 2022 data to label headlines as phrase, passage, or multi spoilers with models like Logistic Regression, BiLSTM, and ModernBERT.

Tech Stack: NLTK, Transformers, PyTorch etc.

Quickly Services

A SaaS platform for restaurant and retail management to automate operations, and monitor everything remotely in real time.

Tech Stack: Laravel, MySQL, Vue JS, REST API etc.
